

# TRIMBLE GRADE CONTROL SYSTEMS.

## 2D GRADE CONTROL BOOSTS EXCAVATOR PRODUCTIVITY.

**52%** less time to complete the productivity study ditch project with 2:1 side slope

**87%** increase in efficiency for drainage, utilities, and trenching projects

**133%** improvement in tons per hour production

**32%** fewer passes or cycles to get the job done

**47%** less fuel than when the project was done using traditional methods

The Construction Technology Standard

2D Productivity Study conducted by CATERPILLAR®.
